ENGINEER OF LIGHT.

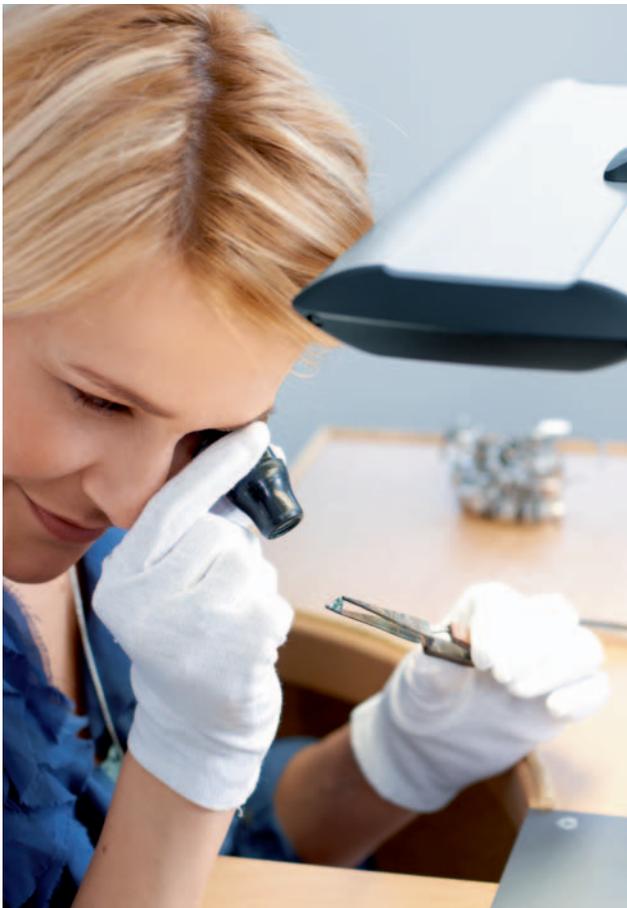

**SEE BETTER.**  
LED LIGHT FOR GOLDSMITHS.

# TANEO.

## LIGHTING QUALITY FOR PREMIUM CRAFTSMANSHIP.

Particularly high demands are placed on lighting quality at goldsmith work stations. With its many details, the TANEO LED arm-mounted luminaire is ideally equipped for the requirements of a goldsmith's delicate work.

### High Lighting Quality

The highly developed reflector and light control technology creates diffuse, homogeneous light with soft transitions. This is how TANEO relieves eye strain during demanding visual tasks. In addition, color and contrast can be seen easily with a high color reproduction value and high color temperature.

### More Individuality

Via continuous dimming with memory function, the amount of light can be adjusted to suit the visual task at any time. TANEO has a balanced arm for more convenience. It is easily adjustable, yet stays in position. The optimum setting can also be fixed, if needed.

### Highly Developed LED Technology

With high-quality LED technology and clever heat management, TANEO offers 30% energy savings at the same luminous power in comparison to conventional luminaires. The long service life of the lamps also ensures maintenance-free luminaire operation of up to 50,000 hours and more.

### TANEO arm-mounted luminaires at a glance:

- 30% energy savings
- Maintenance-free LED technology
- Very good color reproduction
- Outstanding contrast sensitivity
- Continuous dimming functionality
- Ergonomic, easy operation
- Three needs-oriented output levels (1,400, 2,600 or 3,600 lx)
- Maximum flexibility

efficient *light*

**Powerful light with optimum glare protection**

With up to 3,600 lux, TANE0 provides goldsmith work stations with plenty of light. Equipped with the opal white screen, it reliably illuminates without it reliably illuminates without disturbing reflections from structures on glossy surfaces.

## **MORE GOOD LIGHT AT THE WORK STATION WITH TEVISIO.**

The TEVISIO magnifier luminaire expands the possibilities for suitable lighting solutions at goldsmith work stations. From the same design line as TANEQ, it supports particularly demanding visual tasks with its large magnifier, continuous dimming functionality, 3D shading effect at the press of a button and its excellent color reproduction.

Light is a significant factor when it comes to ergonomics in the workplace. Good lighting supports work and relieves eye strain. In addition, people who see better can achieve better work results. And as a pleasant side effect, light creates atmosphere and a feeling of well-being.
